

Once you have finished cutting, fold all score lines inwards EXCEPT the roofline with the bat and the scorelines where the very bottom of the roof panels meet the walls as these create the 'eaves'.

Once you have folded your score lines, flip the house over and add glue to the 'best' side of the two flaps indicated on the lumiere. You can then stick it all together and place it over a battery tea light! Do NOT place it anywhere near a real tealight or naked flame!
